-----

It adopts high-safety lithium iron phosphate batteries and is equipped with the province's first integrated system of "new energy + energy storage + digital management and control", with a ...

A 65 MW solar and 92 MWh storage project by European Energy, Sampension and Luminor in Latvia advanced the country's transition toward greater grid flexibility.

Given Latvia's high share of renewable electricity, the need for electricity storage technologies will increase significantly. However, there ...

Based on simulations performed for various levels of vRES installed capacities, we evaluated the hosting capacity of the Latvian grid for each of the innovative measures in study.

Given Latvia's high share of renewable electricity, the need for electricity storage technologies will increase significantly. However, there are also challenges, such as the need ...

Danish renewables company European Energy has secured EUR37.9 million in financing for a major hybrid solar and energy storage project in Latvia, a landmark move for ...

Greensun is pleased to announce the successful shipment of a 20ft containerized energy storage system to a client in Latvia. The system is a fully integrated solution, ...

European Energy has secured EUR 37.9 million of long-term project financing for a hybrid solar and battery storage project in Saldus, Latvia. Once operational, it will be among ...

Latvian energy storage projects are gaining momentum as the country accelerates its transition to renewable
