Wait, no - actually, the real crisis isn't just financial. Last month's oil spill near Henderson Airport showed how fossil dependence threatens marine ecosystems. Solar arrays with flow battery ...

This Project will design and install an array of 2MW solar PV panels, 2MW/0.5MWh energy storage, a control system, and will include augmentation of the grid connection.

Specifically, the funding will help finance two new solar PV power plants in Guadalcanal and Malaita, and a new utility-scale grid-connected energy storage system in Honiara.

Jointly developed by China National Offshore Oil Corporation (CNOOC) and China Southern Power Grid (CSG), it is expected to be the largest parking shed distribution solar power ...

The Honiara Solar Power Station proves that island nations can lead the energy transition. As battery prices drop another 15% this year, expect more Pacific sunshine to turn into reliable ...

A tropical storm knocks out power across Guadalcanal, but a Honiara energy storage container barracks system keeps emergency radios humming and medical equipment running. This isn't ...

With the addition of this 2MW solar farm, Honiara is well-positioned to make meaningful progress in reducing its reliance on fossil fuels, benefiting both residential and commercial consumers.

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Technological advancements are dramatically improving ...

The solar power project consists of 283,500 modules, each with 550W nameplate capacity. 374 inverters are
