---

The Project will develop the largest combined solar photovoltaic and energy storage initiative in Uzbekistan to date.

ASEAN projects -- like the Philippines' Kalayaan expansion and Vietnam's Bac Ai -- are vital to ensuring grid flexibility. Pumped storage offers lifespans exceeding 40 years and ...

The report notes that Singapore already has hydropower and solar PV projects connected to Thailand and Laos, and that other connections have been proposed including ...

Utilities Masdar enters Malaysia market with landmark 200MW floating solar project Masdar has entered the Malaysian market with a landmark 200MW floating solar project at the ...

Southeast Asia's largest floating solar project Occupying approximately 950 acres, the Chereh Dam floating solar plant will have a generation capacity exceeding 300MWp ...

In the Philippines, momentum is building. The Department of Energy's fourth Green Energy Auction (GEA-4) is the first to integrate energy storage with new solar capacity, which ...

The joint US\$80 million Development and Construction Facility ("the Facility") will finance the development and construction of solar, hybrid solar, and battery storage projects in ...

In the Philippines, momentum is building. The Department of Energy's fourth Green Energy Auction (GEA-4) is the first to integrate ...

Masdar led consortium signs PPA for a 200MW floating solar project under Malaysia's LSS Cycle 5+ with the lowest tariff in its category \$208 million Chereh Dam project ...

The Southern Johor Renewable Energy Corridor (SJREC) forms part of a \$6 billion project developing a 2,000 kilometer-squared hybrid solar and battery energy storage system ...

A new floating solar farm will cover 36% of Lower Seletar Reservoir, contributing significantly to Singapore's renewable energy goals by 2029. Read more at [straitstimes](https://www.straitstimes.com) .

The report notes that Singapore already has hydropower and solar PV projects connected to Thailand and Laos, and that other ...
