-----

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

Even though battery storage capacity is growing fast, in 2024 it was only 2% of the 1,230 GW of utility-scale electricity generating capacity in the United States.

Graph of typical energy storage capacity compared to typical discharge duration for various geologic and nongeologic energy storage methods. ...

The U.S. energy storage market delivered a record-breaking quarter in Q3 2025, installing 5.3 GW nationwide and pushing year-to-date additions past the total installed ...

We recognize that energy capacity in the context of energy storage typically refers to the total energy a battery can hold in watt-hours, kilowatt-hours, ...

According to the U.S. Department of Energy, the United States had more than 25 gigawatts of electrical energy storage capacity as of March 2018. Of that total, 94 percent was ...

Find the latest statistics and facts on energy storage.

Home energy storage systems generally fall into the range of 5 kWh to 20 kWh, allowing users to reduce their dependency on the grid. In contrast, the commercial and ...

The following resources provide information on a broad range of storage technologies.

Of the 1,643 operational energy storage projects worldwide, 49% are located in the U.S., with another 131

projects under construction. 10 California leads U.S. capacity with 15.5 GW, ...

We recognize that energy capacity in the context of energy storage typically refers to the total energy a battery can hold in watt-hours, kilowatt-hours, megawatt-hours, etc.

Graph of typical energy storage capacity compared to typical discharge duration for various geologic and nongeologic energy storage methods. Oval sizes are estimated based on current ...
