The company owns and operates the 750-MW/3,000-MWh battery energy storage system in Moss Landing, California, the largest of its kind in the world.

More than four months after a fire devastated California's Moss Landing battery energy storage facility, recovery efforts remain underway to salvage undamaged batteries. ...

The first phase of the Moss Landing Energy Storage Facility, Vistra Energy's "flagship" California storage system, went up in flames Thursday afternoon, shutting down ...

Overview Battery energy storage facilities History Connections to the California power grid Natural Gas power generation Utilities in California are required by a 2013 law to provide significant battery storage by 2024. The Moss Landing Power Plant site has since been chosen as California's primary location to provide battery based energy storage in order to better utilize renewable energy sources such as solar and wind on a grid-wide commercial scale. On June 29, 2018 Vistra Corp announced that it planned on building at the Moss Landing Power Station site, what became the world's largest c...

Seven months after a huge fire at one of the world's largest battery storage plants, the U.S. Environmental Protection Agency announced Wednesday that crews will soon begin ...

The Moss Landing Energy Storage Facility utilizes advanced technology to provide durable and efficient energy storage solutions. It incorporates state-of-the-art lithium battery ...

The Moss Landing Power Plant is a natural gas powered electricity generation plant as well as a battery energy storage facility, located in Moss Landing, California, United States, at the ...

After Moss Landing, what's next for battery storage? The fire that destroyed a 300-MW battery installation is

a "learning opportunity" for a safety-conscious industry, experts say.

Seven months after a huge fire at one of the world's largest battery storage plants, the U.S. Environmental Protection Agency ...

Owner Vistra Energy has announced the completion of work to expand its Moss Landing Energy Storage Facility in California, the world's largest lithium battery energy storage ...

Understandably, Peninsula Clean Energy has received questions about what happened at Moss Landing and whether similar risks exist with our battery storage projects.
