----

Delta announced a 20-foot AI containerized data center for edge computing, 800V HVDC power architecture solutions, and advanced cooling systems including liquid-to-liquid ...

An efficient and low-carbon solar-driven cooling and power solution is provided, demonstrating strong potential for practical application in data centers.

Our pre-engineered, containerized units ship ready to operate with integrated on-site power. This model reduces development time, cuts risk, and delivers immediate access to compute and ...

Following the growing applications for edge computing, Delta is introducing a new generation of Containerized Data Center Solutions with flexible power and cooling designs, quick ...

This whitepaper looks at the data center industry and its need for a reliable source of carbon-free energy -- and why one renewable solution stands out in meeting data center needs.

The showcase features the newly launched AI containerized data center solution designed for edge computing. This 20-foot container, ...

This guide explores how solar energy can transform data center operations, from reducing costs and environmental impact to creating reliable power delivery and future scalability.

This guide explores how solar energy can transform data center operations, from reducing costs and environmental impact to ...

It isolates external harsh environments and offers the same high reliability as traditional data centers, making it ideal for edge computing, small and medium enterprises.

Delta showcases innovative AI-ready data center solutions at COMPUTEX 2025, including containerized data centers, HVDC power architecture, and advanced cooling ...

Delta showcases innovative AI-ready data center solutions at COMPUTEX 2025, including containerized data centers, HVDC power ...

Following the growing applications for edge computing, Delta is introducing a new generation of Containerized Data Center Solutions with flexible ...

The solar panels, inverters, and battery storage systems are installed and integrated with the data center"s existing power infrastructure. This phase ensures that the solar system works ...

The showcase features the newly launched AI containerized data center solution designed for edge computing. This 20-foot container, which integrates power, cooling, and IT ...
