Which Inverter should I buy in New Zealand?

In New Zealand, we strongly recommend GoodWe's range of inverters. GoodWe's main advantage is having 3 MPPT's, which allow greater flexibility on how panels can be arranged and distributed on your roof to generate the most power.

Are inverters affecting New Zealand's power system?

Inverters do more than just convert DC electricity from panels into AC power for homes--they help manage grid frequency and voltage too. An analysis found that as solar adoption rises, New Zealand's power system could lose some traditional stabilizing features like system inertia and governor response (Vong et al., 2017).

What types of solar inverters are available in NZ?

There are different types of inverter available. This includes inverters that can connect to the electricity grid based on your home's connection. One of the most common types of solar inverter in use in NZ, however, is the hybrid inverter.

Does New Zealand need a solar inverter connection guideline?

To smooth the integration process, New Zealand has introduced a solar inverter connection guideline that streamlines approvals for systems up to 10kW, ensuring safer and faster solar deployment (Strahan et al., 2016). Practical case studies from around the country prove how effective solar energy can be when well-designed.

Sofar Solar 3K TL Inverter: efficient, WiFi-enabled, easy install, IP65, single phase--ideal for NZ home solar panel setup & residential solar installation.

In this guide, we'll break down what an inverter is, the important role it plays in your system and tell you why we think Fronius offers the best inverters for New Zealand ...
