Where is the first battery energy storage system in Latvia?

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region.

Who is responsible for the energy transition in Latvia?

Local authorities are responsible for municipal energy supply and renewable energy projects, with Latvia's energy transition guided by the National Energy and Climate Plan and the Energy Strategy 2050.

What is the main source of renewable electricity in Latvia?

Hydroelectric power is the main source of renewable electricity in Latvia, followed by solar, wind and biomass cogeneration plants. In 2024, solar power in Latvia grew over 3.1 times to 6.7% of total electricity, becoming the third-largest source, while wind reached a record 38 GWh and hydropower, despite a 16% drop, still provided 54%.

The largest energy storage battery system will provide energy storage to transfer the generated electricity to users when there is a shortage in the electricity system.

Latvian power storage manufacturers are reshaping Europe's renewable energy landscape with cutting-edge battery systems and grid stabilization technologies. Discover how these solutions ...

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, ...

Latvian energy storage projects are gaining momentum as the country accelerates its transition to renewable energy. This article explores key players, emerging technologies, and market ...

As we approach Q4 2025, industry watchers are keeping tabs on Latvia's first gigafactory for battery cells. When operational, it'll slash import costs by 60% and create 800+ skilled jobs.

Specializing in turnkey power containers since 2012, we serve clients across 14 countries. Our Liepaja facility combines Baltic engineering precision with agile manufacturing.

Secure Latvia's power grid with Rolls-Royce's large-scale battery storage, syncing Baltic energy with Europe by 2025.

Discover the ENERGY CUBE 50kW/100kWh air-cooled energy storage system, designed for smart commercial and industrial applications. Optimize energy efficiency and reliability with our ...

In November 2024, Utilitas Wind Ltd inaugurated Latvia's first storage battery system with a capacity of 10 MW and 20 MWh in Targale, next to the existing wind park.

In Latvia, an increasing number of households, industrial and commercial enterprises are adopting solar or backup power solutions. With its factory-direct pricing, high efficiency, long lifespan, ...

The largest energy storage battery system will provide energy storage to transfer the generated electricity to users when there is a ...

Developed by Utilitas Wind, a subsidiary of Estonian energy company Utilitas, the BESS project is a EUR7 million investment. The system comprises six containerized BESS units, ...
