How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much do solar panels cost?

Individual solar panels cost between \$120 and \$200 for a standard 400-watt panel when purchased as part of a complete system. However, panels represent only 12-20% of total system cost. The majority of expenses come from inverters, mounting hardware, electrical components, labor, and soft costs like permitting.

How much does a commercial solar system cost in 2025?

In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation. Here are five steps to help you calculate how much a system will cost to install for your home:
