The Aldelano Solar Container Farm(TM) is a new, innovative vertical farming solution that thrives within an insulated, custom-built, climate controlled shipping container.

The durable container design is completely waterproof, protects you and your equipment from the elements and any potential security threats. RPS pre-wires all internal components.

Throughout this blog, we will dive into the benefits of solar-powered aquaculture, discuss the practical challenges, and showcase real-world examples where solar energy has ...

Aquavoltaics is the integration of floating solar panels on water surfaces while continuing aquaculture activities (fish, shrimp, crabs) ...

Our turnkey water module is a water purification system using ultrafiltration.

Aquavoltaics is the integration of floating solar panels on water surfaces while continuing aquaculture activities (fish, shrimp, crabs) below. It maximizes water resources for ...

This project demonstrates how renewable energy can support the high power demands of automated aquaculture systems, even in off ...

Instead of covering valuable farmland or rooftops, solar panels can be placed on the surface of ponds, lakes, reservoirs, or even large aquaculture tanks. This approach uses ...

This project demonstrates how renewable energy can support the high power demands of automated aquaculture systems, even in off-grid conditions. Our client saw quick ...
