What are the shipping guides for lithium cells & batteries?

For the purposes of this document, the ways to describe and configure packages of lithium cells and batteries, including smaller cells and batteries, are divided between ten distinct, standalone shipping guides. The shipping guides are numbered Guide 01 - Guide 10.

Can lithium-ion batteries be used for large energy applications?

The use of lithium-ion batteries for large energy applications is still relatively new, especially in the marine and offshore industries. ABS has produced this document to provide requirements and reference standards to facilitate effective installation and operation of lithium-ion battery systems. for marine systems.

What are the lithium-ion batteries in containers guidelines?

The Lithium-ion Batteries in Containers Guidelines that have just been published seek to prevent the increasing risks that the transport of lithium-ion batteries by sea creates, providing suggestions for identifying such risks and thereby helping to ensure a safer supply chain in the future.

What are the new packaging requirements for lithium ion batteries?

Revised Packing Instructions: More stringent requirements for UN-certified packaging, capable of withstanding specific drop tests. State of Charge (SoC) Emphasis: Increased scrutiny on the SoC for standalone lithium-ion battery shipments, with a general requirement not to exceed 30% of rated capacity.

The Guidelines are intended to highlight the risks that Lithium-Ion batteries can present, providing guidance and suggestions for identifying the risks and ensuring safe ...

All stakeholders involved in the carriage of Lithium-Ion Batteries in containers are asked to carefully review these Guidelines to determine if they can be implemented and ...

The Guidelines are intended to highlight the risks that Lithium-Ion batteries can present, providing guidance and suggestions for ...

The Guidelines focus on the specific risks associated with shipping lithium-ion cells. Lithium-ion cells are the primary elements of a battery and are different from lithium-ion ...

View and Download "CINS Guidelines for Shipping Lithium-ion Cells in Containers" here. It is intended for shipping companies, operators and carriers to help with safe ...

Together with the International Group and other partners, the Cargo Incident Notification System Network (CINS) has compiled a comprehensive ...

This document provides shipping companies, operators and carriers with safety standard guidance for the transportation of lithium-ion cells, classified under UN Nos. 3480 ...

The International Safe Containerised Cargo Organisation (CINS) has issued guidelines for shipping lithium-ion cells in containers.

The use of lithium-ion batteries for large energy applications is still relatively new, especially in the marine and offshore industries. ABS has produced this document to provide requirements and ...

The IMDG Code Amendment 42-24 is the cornerstone of the updated regulations, bringing significant changes to the classification, packaging, and handling of lithium-ion batteries and ...

Together with the International Group and other partners, the Cargo Incident Notification System Network (CINS) has compiled a comprehensive publication covering the properties of these ...

Each distinct shipping guide in this document refers to the regulatory requirements for a specific lithium cell/battery type, configuration, and size. In this way, a shipper will easily find the ...

This document provides shipping companies, operators and carriers with safety standard guidance for the transportation of lithium-ion ...

All stakeholders involved in the carriage of Lithium-Ion Batteries in containers are asked to carefully review these Guidelines to ...
