When should you replace a circuit breaker?

The main circuit breaker is a critical component of your home's electrical system, responsible for controlling the electricity flow and protecting the circuits from overloads or faults. Replacing it is necessary when it shows signs of wear or damage. 1.

What should I do if I need a new circuit breaker?

Replacement main circuit breaker - Smart breaker (if upgrading) 1. Safety First: - Turn off all appliances and devices connected to your electrical system. - Wear insulated gloves and goggles to protect yourself from electrical hazards. 2. Shut Off the Power: - Locate the main circuit breaker panel and shut off the main power supply.

What is a circuit breaker?

By continuing to use our site, you agree to our cookie policy. A circuit breaker is designed to stop the power flow through a circuit if there is an excessive amperage drawn on said circuit. Occasionally, these breakers go bad and will need to be changed.

How do you change a circuit breaker?

To change a circuit breaker, find the main circuit breaker box and locate the defective breaker by looking for a tripped breaker. Next, turn off the branch breaker boxes, the main power, and the individual breakers. Remove the screws holding the circuit panel's face plate, then loosen the screws holding the wires on the defective breaker.
