How much does a 5 kW solar system cost in San Antonio?

While a 5 kW system will only cost you \$10,751 in San Antonio, TX, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in San Antonio, TX?

How much does a solar panel installation cost?

Solar panel installation costs vary by the installation company and project scope, making it challenging to pinpoint exactly how much you'll pay to have a pro install your solar panels. However, the U.S. Department of Energy estimates that installers add around \$2.25 per watt to the cost of a solar panel installation.

Are solar panels worth it in San Antonio?

Solar panels are worth it in most areas, including San Antonio, TX. Certain factors, including the cost of electricity, incentives, climate, and the angle at which the sun hits your roof, impact how quickly you break even on your investment relative to other areas around the U.S.

How can EnergySage help you find the right solar panel system?

Each additional quote you receive for solar will help you find the right solar panel system at the right price. This is where EnergySage can help. With funding from the Department of Energy's SunShot Prize, EnergySage opened the country's first (and now the largest) marketplace for home solar panel installations.
