-----  
What are the power plants in Kosovo?

The greatest part of generation capacities of Kosovo are the two power plants: Kosova A and Kosova B. The capacities of the two power plants are lower than the installation parameters level, because of the outdated system and lack of maintenance during the last decade of the 20th century.

Will Kosovo B power plant be refurbished?

The planned refurbishment of two units in the Kosovo B power plant, alongside at least one unit in the Kosovo A power plant, aims to secure a minimum baseload capacity of 540 MW and a strategic reserve capacity of 360 MW by 2030. Kosovo B Power Station was opened in 1983.

How many MW is the Kosovo B power plant?

The units B1 and B2 of the Kosovo B power plant, integral to Kosovo's lignite-based electricity generation, were commissioned in 1983 and 1984, respectively. Each unit has an installed capacity of 339 MW and is currently operating at an available capacity of 260 MW.

Are power plants polluting the environment in Kosovo?

Since most of electric power is produced by power plants in Kosovo they are considered the main environment pollutant. Actual emission of gases, dust and waste-water discharged from the existing power plants, are above the levels allowed by the EU directives.

The Kosovo Energy Strategy 2022-2031 represents a critical step towards a more sustainable and cleaner energy future for Kosovo, balancing economic development needs ...

Kosovo electricity production comes from two lignite-fired power plants, Kosovo A and Kosovo B. Kosovo A was built during the 1960s with Soviet technology, while Kosovo B was built ...

This project aims to improve the energy production capacities and increase the efficiency of this unit, contributing to strengthening the security and sustainable development ...

It includes refurbishing the Kosovo B1 and B2 power plant units to ensure a secure energy supply and lower emissions. This refurbishment will occur in two stages, with the aim of completing ...

Kosovo still generates electricity primarily from coal-fired power plants, but a rapid expansion of green energy is aiming to change this. A photovoltaic system is being built on the areas where ...

4 Recommendations about the draft energy strategy of Kosovo 2022-2031 In the following, there are some of the suggestions and recommendations presented by the Riinvest Institute, which ...

With EUR137 million allocated for the rehabilitation and modernization of Unit A3 at the Kosova A power plant, this project is set to strengthen Kosovo's energy security and ...

There is a vital need for stable, base-load power generation in Kosovo that can meet demand. Power shortages and outages have grown less frequent but can still occur ...

Kosovo has signed several agreements for cooperation on energy sector with Albania. The fact that the electrical energy system of Albania relies on hydro energy (almost 100%), while ...

A renewable energy investment of more than EUR 43 million is underway in Glogovc (also known as Glogovac and Drenas). Yildirim Group's subsidiary Yildirim Energy ...
