Could a seafold 40' container slash the cost of repositioning empty containers?

More than a fifth of containers are returned empty to their port of origin empty, according to estimates. CCS claims that the SeaFold 40' box could potentially slash the cost of repositioning empty containers by 56%, save storage space by 80%, and drive down carbon emissions by 70%.

What is a seafold 40' container?

A collapsed bundle of five SeaFold 40' containers accommodates the same slot as one conventional 40' High Cube container creating 80% more storage and operating cost efficiencies at terminals, railheads, and ports, along with reducing lifts and container movement on ships, truck, rail, and barges.

How does the seafold 40' container assembly process work?

The assembly process of the SeaFold 40' container is streamlined and designed to facilitate ease of use while adhering to the highest industry standards of safety and efficiency. The unfolding process is initiated through the release of secure locks that hold the structure in its condensed form.

How many pallets can a seafold container hold?

The SeaFold 40' HC interior floor plan can accommodate 21 standard U.S. and Europe pallets per pallet tier and meets all internal dimension requirements. Are there SeaFold containers available to sea trial?

CCS claims that the SeaFold 40" box could potentially slash the cost of repositioning empty containers by 56%, save storage space by 80%, and drive down carbon ...

The advantages are obvious since two 40-foot containers (or 4 twenty-foot) can be stacked on a rail car, essentially doubling the capacity of a unit train.

When collapsed, a bundle of five SeaFold containers accommodates the same slot as one standard 40" HC
