Uses local climate data, your roof measurements, current local electric rates and current solar system cost to generate an accurate solar cost and savings estimate, customized for your home.

The Aquatec SWP-6000 submersible pump is designed to supply water in off-grid locations for homes, irrigation, livestock, and many other applications.

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on ...

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

The Aquatec SWP-6000 is made in America and is FDA and NSF approved for use with potable water. This pump operates from any 12-30 volt DC power source, including modern 60-72 cell ...

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for ...

It's a great pump to use with solar for moving a large amount of water. It measures about 5.75" and should be used with well casings of 6" or larger, or in open water. The SWP ...

Aquatec SWP-6000 " Deep Well Diaphragm submersible pump are designed for off-grid locations applications.

Tesla solar makes it easy to produce clean, renewable energy for your home and to take control of your energy use. Learn more about solar.
