What are the different types of circuit breakers?

Fortune Electrical Corporation's circuit breakers are available in various types, such as miniature circuit breakers (MCB), molded case circuit breakers (MCCB), residual current circuit breakers (RCCB), and more. These devices are made to the highest quality standards and are designed to protect electrical systems from overloads and short circuits.

What is a secondary circuit breaker (MCB or RCCB)?

In case of any defect in wiring or in case of short circuit, a specific secondary circuit breaker (MCB or RCCB) trips, thereby preventing high short circuit current to reach any gadget or even human and hence adding an element of safety. SKU: 601470 Product Features: BLANKING PLATE ACCESSORIES FOR DBS

What is the breaking/interrupting capacity of a circuit breaker?

The breaking/interrupting capacity ranges from 65 to 130kA, with a maximum breaking time of 40 ms and a maximum making time of 80 ms. These circuit breakers also have built-in electronic trip relays that comply with IEC947-2 standards. They come with pre-alarm LEDs for overcurrent and comply with ASTA's type test authority.
